SUMMARY

Experienced full stack software developer seeking full stack roles in SaaS companies

PROFESSIONAL EXPERIENCE

Front End & Back End Developer — Private Boxing Lessons App (2024–2024) (front end (demo), back end, live demo - users, live demo - admin)
• Developed a schedule app (demo) manager for coaches, allowing them to manage group lessons
• Developed a schedule app (demo) for participants, allowing them request private lessons.
• Utilized Express, Two-Factor Authentication (2FA), nodemailer, MongoDB & email notifications
• Created message, lesson & authentication routers; implemented weekly schedule queries

Front End Developer — Expense Tracker App Project (2023–Present) (github)
• Built a front end app using HTML, CSS, JavaScript, Styled-Components, React & Redux-Toolkit
• Now developing a Full Stack version with new features: authentication route services, DB features for expense queries, new saving & payment categories, adding payment options & authentication views

Front End Developer — Shomrey Haaretz App (2023–2024) (website)
• Used React & Git to code user-facing views in a wizard application
• Developed UIs based on Figma, solving back end API bugs & working with the Back End Team Lead

Front End Developer — Weather App Project (2023–2024) (github)
• Built a front end app using HTML, CSS, JavaScript, Styled-Component, React Icons, React, Redux Toolkit, Geolocation API & AccuWeather API

Full Stack Developer — Music Trivia Project (2023) (front end, back end, live)
• Built a full stack app using MERN: HTML, CSS, JavaScript, Styled-Components, React, Node.js & AWS
